rsc.li/nanoscale-advances

Each one of our outstanding peer reviewers has been carefully selected by our editorial team and includes active researchers who have made significant contributions to peer review and have gone above and beyond in their actions.

"We extend our thanks to all of Nanoscale Advances reviewers for their invaluable contributions and are especially delighted to recognize this year's Outstanding Reviewers for their exceptional dedication and support of the journal." – Professor Dirk M. Guldi, Editor-in-Chief

"High-quality peer review, to a great extent, bridges the gap between initial manuscript level and journal's publication standard, paving the way towards better content presentation and fresh knowledge spread for world-wide research communities. Therefore, we're very delighted to recognize the Nanoscale Advances Outstanding Reviewers who have devoted continuous effort to manuscript review. Without their excellent professionalism and dedicated attitude, this journal's publications could not be elevated. With concerted effort from all sides, we're bound to make greater progress and generate more novel academic ideas on this promising open-access platform." – Professor Yue Zhang, Editor-in-Chief

In recognition of the varied contributions of our reviewer community, our

Outstanding Reviewers for *Nanoscale Advances* in 2024

We would like to take this opportunity to thank all of *Nanoscale Advances* reviewers for helping to preserve quality and integrity in the chemical science literature. We would also like to highlight the Outstanding Reviewers for *Nanoscale Advances* in 2024.

Outstanding Reviewers from 2024 have been chosen based on several different measures, including the number, timeliness and quality of the reports completed over the last 12 months. In addition to reviewers who provided a high number of quality reports, we are pleased to highlight reviewers who provided exceptionally thorough and detailed reports, reviewers who provided clear and insightful adjudicative reports and reviewers who made additional efforts to aid authors in improving their manuscripts.
