Correction: Hollow Au nanoparticles for single-molecule Raman spectroscopy via a synergistic electromagnetic and chemical enhancement strategy

Zihan Gao,^a Haiyao Yang,^a Jianzhi Zhang,^a Jie Yang,^a Lihong Hong^{*a,b} and Zhi-Yuan Li^{*a,c}

DOI: 10.1039/d5nr90063h

rsc.li/nanoscale

Correction for 'Hollow Au nanoparticles for single-molecule Raman spectroscopy via a synergistic electromagnetic and chemical enhancement strategy' by Zihan Gao *et al.*, *Nanoscale*, 2025, <https://doi.org/10.1039/d4nr05311g>.

The authors note a typographical error within the Abstract: the SM-SERS detection limit of three dye molecules (Rhodamine B, Rhodamine 6G and Crystal Violet) was stated as 10 mol L⁻¹. The authors now provide the corrected value of 10⁻¹⁶ mol L⁻¹ and confirm that this change does not affect the conclusions presented.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
