Retraction: Design and synthesis of VEGFR-2 tyrosine kinase inhibitors as potential anticancer agents by virtual based screening

Harun M. Patel, ab Pankaj Bari, Bari, Rajshekhar Karpoormath, Malleshappa Noolvi, Neeta Thapliyal, Sanjay Surana and Pritam Jain and Pritam Jain

DOI: 10.1039/d5ra90070k

rsc.li/rsc-advances

Retraction of 'Design and synthesis of VEGFR-2 tyrosine kinase inhibitors as potential anticancer agents by virtual based screening' by Harun M. Patel *et al.*, *RSC Adv.*, 2015, **5**, 56724–56771, https://doi.org/10.1039/C5RA05277G.

The Royal Society of Chemistry hereby wholly retracts this *RSC Advances* article due to a significant number of errors in the data reported in the article.

In the Experimental section, with the exception of compound 41, the reported yields and melting points of all compounds are incorrect.

The ¹H NMR data reported in the Experimental section and the associated spectra in the supplementary information for compounds 26, 29 and 55 are incorrect.

The HRMS data reported in the Experimental section and the associated spectra in the supplementary information for compounds 3, 22, 26, 29, 47, 55 and 69 are incorrect.

In addition, all IC₅₀ values in the article have been incorrectly reported as nM rather than μ M.

The number and type of errors identified means that the Editor has lost confidence in the overall reliability of the article and therefore this paper is being retracted.

The authors were informed about the retraction. Harun M. Patel responded but did not state whether they agreed with the decision. The other authors have not responded.

Signed: Laura Fisher, Executive Editor, RSC Advances
