 Correction for 'Multi-pronged molecular insights into flavonoid-mediated inhibition of squalene epoxidase: a pathway to novel therapeutics' by Emadeldin M. Kamel *et al.*, *RSC Adv.*, 2025, 15, 3829–3848, <https://doi.org/10.1039/D4RA09076D>.

The authors regret that their related work, cited here as ref. 1, was not cited in the original article. Ref. 1 was undergoing peer review at the same time as this article. Although both projects interrogate squalene epoxidase (SQLE) inhibition, each employs a unique, non-overlapping compound library designed around separate SAR hypotheses that emerged from our initial virtual-screening campaign. Ref. 1 focuses on alkaloids, whereas this article focuses on flavonoids.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
