Correction: Heterogeneous organocatalysis: the proline case

Gustavo Senra G. de Carvalho,* Douglas C. Alcântara Pinto, Robson Corrêa da Silva and Fernando de Carvalho da Silva*

Correction for 'Heterogeneous organocatalysis: the proline case' by Gustavo Senra G. de Carvalho *et al.*, *RSC Adv.*, 2025, **15**, 22469–22504, <https://doi.org/10.1039/D5RA02331A>.

The authors apologize that a related reference, presented here as ref. 1, was not cited in the original article. On page 22470, in the fifth paragraph of the Introduction, a citation to the reference should be added at the end of the sentence beginning "In fact, a very interesting molecule...".

Ref. 16 in the original article should be ref. 16a, and the omitted reference should be ref. 16b:

"In fact, a very interesting molecule that well exemplifies the innovation brought by organocatalysis is exactly the amino acid proline, which has become a crucial component in examples of all catalytic strategies.^{16a,b}"

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
