Correction for 'Construction of an autocatalytic reaction cycle in neutral medium for synthesis of life-sustaining sugars' by Hiro Tabata *et al.*, *Chem. Sci.*, 2023, 14, 13475–13484, <https://doi.org/10.1039/D3SC03377E>.

The authors regret that there are a number of typographical errors in the article, as detailed here.

The text reading “The main text of the article should appear here with headings as appropriate.” near the bottom of the second column on page 13477 should be deleted.

Part (d) of the caption for Fig. 3 should read as follows: “(d) Proposed reaction scheme for r-2 → r-6 in which a sodium ion and a Brønsted base work concertedly on HCHO and C2a → C4a. Calculated free energy diagram for r-6 catalyzed by NaOH (black) or Na₂WO₄ (brown) in water”.

The text “LVBE transformations” near the bottom of the first column on page 13478 should read “LVBE → LBVE transformations”.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
