Correction: Proteolysis targeting chimeras (PROTACs) come of age: entering the third decade of targeted protein degradation

Michael J. Bond^a and Craig M. Crews^{*abc}

Correction for 'Proteolysis targeting chimeras (PROTACs) come of age: entering the third decade of targeted protein degradation' by Michael J. Bond *et al.*, *RSC Chem. Biol.*, 2021, **2**, 725–742, <https://doi.org/10.1039/D1CB00011J>.

The authors regret that an incorrect version of Fig. 4 was included in the original article which labelled Bordoxalone as an *Irreversible* covalent E3 ligase recruiting element (E3RE), when Bordoxalone should have been labelled as a *Reversible* covalent E3RE. This was stated correctly in the main text. The correct version of Fig. 4 is presented below.

VHL and CRBN

Synergistic E3REs

Covalent E3REs

Reversible Covalent E3RE

Fig. 4 Chemical structures of E3 ligase recruiting elements (E3REs) used in TPD.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
