

High-Entropy Alloy Nanostructures: from theory to application

Burlington House, London,
UK and online

24–26 September 2025

FARADAY DISCUSSIONS

Volume 264, 2026

The Faraday Community for Physical Chemistry of the Royal Society of Chemistry, previously the Faraday Society, was founded in 1903 to promote the study of sciences lying between chemistry, physics and biology.

Faraday Discussions (Print ISSN 1359-6640, Electronic ISSN 1364-5498) is published 8 times a year by the Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge, UK CB4 0WF.

Volume 264 ISSN 978-1-83707-070-1

2026 annual subscription price: print+electronic £1355

US \$2385; electronic only £1291, US \$2272.

Customers in Canada will be subject to a surcharge to cover GST. Customers in the EU subscribing to the electronic version only will be charged VAT.

All orders, with cheques made payable to the Royal Society of Chemistry, should be sent to the Royal Society of Chemistry Order Department, Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge, CB4 0WF, UK
Tel +44 (0)1223 432398; E-mail orders@rsc.org

If you take an institutional subscription to any Royal Society of Chemistry journal you are entitled to free, site-wide web access to that journal. You can arrange access via Internet Protocol (IP) address at www.rsc.org/ip

Customers should make payments by cheque in sterling payable on a UK clearing bank or in US dollars payable on a US clearing bank.

Faraday Discussions

Faraday Discussions are unique international discussion meetings that focus on rapidly developing areas of chemistry and its interfaces with other scientific disciplines.

Scientific Committee volume 264

Chairs

Jette Katja Mathiesen, Technical University of Denmark, Denmark
Stephan Barcikowski, University of Duisburg-Essen, Germany

Committee

Damien Alloyeau, CNRS, France
Nicola Morley, University of Sheffield, UK
Robert Weatherup, University of Oxford, UK

Faraday Standing Committee on Conferences

Chair

Caroline Dessert, University of York, UK

Emma Gibson, University of Glasgow, UK

Secretary

Susan Weatherby, Royal Society of Chemistry, UK

Julia Lehman, University of Birmingham, UK
Andrew Mount, University of Edinburgh, UK

George Booth, King's College London, UK

Julia Weinstein, University of Sheffield, UK

David Fermin, University of Bristol, UK

Martijn Zwijnenburg, University College London, UK

Advisory Board

Vic Arcus, The University of Waikato, New Zealand

Michel Orrit, Leiden University, The Netherlands

Timothy Easun, Cardiff University, UK

Zhong-Qun Tian, Xiamen University, China

Dirk Guldí, University of Erlangen-Nuremberg, Germany

Siva Umamathy, Indian Institute of Science, Bangalore, India

Marina Kuimova, Imperial College London, UK

Bert Weckhuysen, Utrecht University, The Netherlands

Luis Liz-Marzán, CIC biomaGUNE, Spain

Julia Weinstein, University of Sheffield, UK

Andrew Mount, University of Edinburgh, UK

Sihai Yang, University of Manchester, UK

Frank Neese, Max Planck Institute for Chemical Energy Conversion, Germany

High-Entropy Alloy Nanostructures: from theory to application

Faraday Discussions

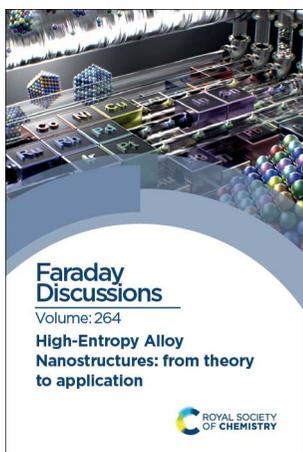

www.rsc.org/faraday_d

A General Discussion on High-entropy alloy nanostructures: from theory to application was held in London, UK on the 24th, 25th and 26th of September 2025.

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

PREFACE

- 9 Preface: High-entropy alloy nanostructures: from theory to application**
Jette Katja Mathiesen and Stephan Barcikowski

INTRODUCTORY LECTURE

- 11 Spiers Memorial Lecture: Multicomponent and high-entropy materials: an overview**
Brian Cantor

PAPERS AND DISCUSSIONS

- 64 Exploration of nanostructured high-entropy alloys for key electrochemical reactions: a comparative study for the solid solution systems Cu–Pd–Pt–Ru, Ir–Pd–Pt–Ru and Ni–Pd–Pt–Ru**
Jan Lukas Bürgel, Rico Zehl, Felix Thelen, Ridha Zerdoumi, Olga A. Krysiak, Benedikt Kohnen, Ellen Suhr, Wolfgang Schuhmann and Alfred Ludwig

POSTER SPONSORSHIP

**Nanoscale
Horizons**

Nanoscale

**Nanoscale
Advances**

- 83 High-throughput synthesis of multi-element alloy nanoparticles using solvothermal continuous-flow reactor**
Megumi Mukoyoshi, Kohei Kusada, Xin Zhou, Takaaki Toriyama, Tomokazu Yamamoto, Yasukazu Murakami and Hiroshi Kitagawa
- 95 Elucidating the reversible exsolution–dissolution behaviour of high-entropy oxides in crystalline and amorphous phases**
Qingju Wang, Hailing Yu, Kevin Siniard, Zhenzhen Yang and Sheng Dai
- 112 Stabilisation of FeCoNiCuPt high-entropy alloy nanoparticles by surface capping**
Anurag Sharma and Andrew L. Hector
- 132 Evaluation of microstructure and phase formation in nanocrystalline FeCoCuNbMo high-entropy alloy synthesised by mechanical alloying**
J. Sharath Kumar, K. Nanda Kishore, Rakesh Kumar and Rajeev Verma
- 151 Amorphization of laser-fabricated ignoble high-entropy alloy nanoparticles and its impact on surface composition and electrochemistry**
Robert Stuckert, Felix Pohl, Natalia Shkodich, Oleg Prymak, Nico Koch, Ulrich Schürmann, Michael Farle, Lorenz Kienle, Stephan Barcikowski and Christoph Rehbock
- 178 Synthesizing high-entropy alloy nanoparticles: general discussion**
- 207 Morphological, structural and compositional evolution of PtPdFeCoNi high-entropy alloy nanoparticles towards bifunctional oxygen electrocatalysis**
Priya Jain, Pouya Hosseini, Aleksander Kostka, Eko Budiyanto, Patrick Diehl, Martin Muhler, Harun Tüysüz, Dongshuang Wu and Tong Li
- 231 Reactivity of high-entropy alloy nanoparticles under O₂ studied by *in situ* transmission electron microscopy**
Syrine Krouna, Nathaly Ortiz Peña, Christian Ricolleau, Guillaume Wang, Adrien Moncomble, Damien Alloyeau and Jaysen Nelayah
- 244 Surface segregation and mixing propensity in noble metal AgAuCuPdPt nanoalloys upon element enrichment – a computational perspective**
Florent Calvo
- 268 On the use of advanced scanning transmission electron microscopy and machine learning for studying multi-component materials**
Alexander S. Eggeman, Christian Maddox, Mark A. Buckingham, Zhiquan Kho, Ran Eitan Abutbul, Siguang Meng, Xu Aiwanshu and David J. Lewis
- 279 Thermal stability of CoNiPtCuAu nanoalloys: from segregation to melting properties**
Anissa Acheche, Jaysen Nelayah, Riccardo Gatti, Damien Alloyeau, Christian Ricolleau and Hakim Amara
- 297 X-ray and neutron diffraction patterns of the AlCrTiV high-entropy alloy and quaternary Heusler structures**
Nedjma Kalliney and Michael Widom
- 308 Advanced structural characterization of high-entropy alloy nanostructures: general discussion**

- 325 **Modelling adsorbate coverage on complex alloy surfaces**
Martin L. S. Nielsen, Jack K. Pedersen, Marcus F. Nygaard, Mads K. Plenge, Henrik H. Kristoffersen and Jan Rossmeisl
- 344 **Electrochemical synthesis of high entropy nanoparticles and the exploration of the Pd–Ag–Au composition space for the oxygen reduction reaction**
Menglong Liu, Divyansh Gautam, Christian M. Clausen, Ahmad Tirmidzi, Gustav K. H. Wiberg, Jan Rossmeisl and Matthias Arenz
- 358 **Optimising descriptors to correlate stability of C- or N-doped high-entropy alloys: a combined DFT and machine-learning regression study**
Chih-Heng Lee, Jyh-Wei Lee and Hsin-Yi Tiffany Chen
- 376 **Mechanically alloyed NiCuMnWX (X = Co, Fe, or Mo) high-entropy alloy electrocatalysts for alkaline water splitting**
Hossein Mahdavi, Armin Asghari Alamdari, Jonathan Quinson, Uğur Ünal and Hadi Jahangiri
- 391 **Tailoring Pd content for optimal stability in FeCoNiCu multielement alloy electrocatalysts for oxygen evolution reaction**
Bing Zhu, Qiqi Huang, Okkyun Seo, Yee Yan Tay, Jiayi Tang, Huayu Gu, Tong Li and Dongshuang Wu
- 400 **Computational insights into the corrosion behavior of NbTaMoW and NbTaMoWV high-entropy alloys in molten fluoride salts**
Agnes Britte Katai, Arjun Varma Ramasimha Varma and Conrad Giresse Tetsassi Feugmo
- 422 **Application of high-entropy alloy nanostructures in electrocatalysis: general discussion**
- 439 **Processing-driven chemical ordering and its effect on magnetic properties in a high entropy alloy**
V. Chaudhary, S. Dasari, A. Sharma, R. V. Ramanujan and R. Banerjee
- 453 **Nanocrystalline CoMnFeNiGa high entropy alloys: room temperature ferromagnetism bridging the gap from bulk to nano**
N. F. Shkodich, T. Smoliarova, V. Nallathambi, L. M. Feitosa, E. Adabifiroozjaei, I. Tarasov, M. Grzywa, B. Gault, S. Reichenberger, L. Molina-Luna, S. Barcikowski and M. Farle
- 474 **Optical responses from high-entropy alloys: experimental results and perspectives**
Alexandre Nominé, Alexander I. Solomonov, Juš Polanšek, Maxime Vergès, Yann Battie, Stéphanie Bruyère, Jaafar Ghanbaja, Jean-François Pierson, Janez Zavašnik, Michael Feuerbacher, Uroš Cvelbar, Thierry Belmonte and Valentin Milichko

CONCLUDING REMARKS

- 494 **Concluding remarks: Achievements, challenges, and trajectories for high-entropy alloy nanoparticles**
Dierk Raabe
- 510 **Magnetic properties of high-entropy alloy nanostructures: general discussion**
