

Natural Product Reports

High impact, critical reviews in natural product research and related areas

rsc.li/npr

The Royal Society of Chemistry is the world's leading chemistry community. Through our high impact journals and publications we connect the world with the chemical sciences and invest the profits back into the chemistry community.

IN THIS ISSUE

ISSN 0265-0568 CODEN NPRRDF 43(5) 781–1064 (2026)

Rep., 2026, 43, 787.

HIGHLIGHTS

787

AI and mechanistic modeling for characterizing biosynthetic pathways of natural products

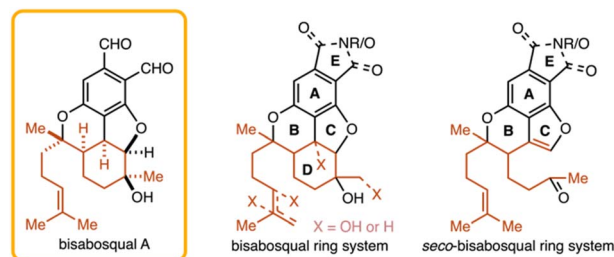

Byung Tae Lee, Byeongsu Lee, Joon Young Kwon, Tilmann Weber* and Hyun Uk Kim*

803

Isolation and synthesis of bisbosquals, fungal triprenyl phenol meroterpenoids with a densely functionalised bisabolane core

James P. Shephard and David W. Lupton*

RSC Advances

At the heart of open access for
the global chemistry community

Editor-in-chief

Russell J Cox

Leibniz Universität Hannover, Germany

We stand for:

Breadth We publish work in all areas of chemistry and reach a global readership

Quality Research to advance the chemical sciences undergoes rigorous peer review for a trusted, society-run journal

Affordability Low APCs, discounts and waivers make publishing open access achievable and sustainable

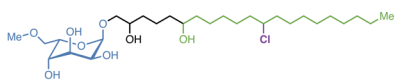

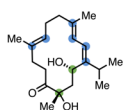

Community Led by active researchers, we publish quality work from scientists at every career stage, and all countries

1008

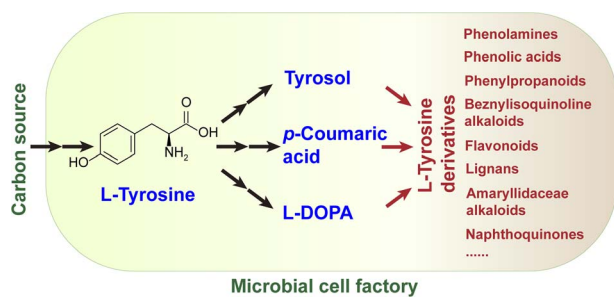

Cyanobacterial NPs Highlight 2021–2024

Highlights of cyanobacterial metabolites reported between 2021–2024

Simon Sieber* and Elisabeth M.-L. Janssen*

1026

Charting the path for L-tyrosine derivatives: from engineering strategies to microbial cell factories

Li Zhou, Xulei Shi, Hui Jiang, Yuanyuan Xia, Haiquan Yang, Wei Shen, Yu Cao and Xianzhong Chen*
