

Chemistry Education Research and Practice

rsc.li/cerp

A fully refereed electronic journal for teachers, researchers and other practitioners in chemistry education

IN THIS ISSUE

ISSN 1756-1108 CODEN CERPCE 27(1) 1–680 (2026)

Cover

See Chun-wan Timothy Lo and Sharonna Greenberg, pp. 13–30.

REVIEWS

13

Lowering the activation barrier to create a constructively aligned undergraduate chemistry laboratory experience – a review of innovations in assessments and course design

Chun-wan Timothy Lo and Sharonna Greenberg*

31

A systematic literature review of game-based approaches in chemistry education (2014–2024)

Sule Elmali,* Luzia Freund and Rüdiger Tiemann

Advance your career in science

with professional recognition that showcases
your **experience, expertise and dedication**

Stand out from the crowd

Prove your commitment
to attaining excellence in
your field

Gain the recognition you deserve

Achieve a professional
qualification that inspires
confidence and trust

Unlock your career potential

Apply for our professional
registers (RSci, RSciTech)
or chartered status
(CChem, CSci, CEnv)

Apply now

PAPERS

45

Failing forward in chemistry laboratory courses: the impact of engagement and mistakes during pre-lab activities on students' situational engagement

Reetta Kynnäräinen,* Lars-Erik Malmberg, Elisa Vilhunen, Mikko-Jussi Laakso and Veli-Matti Vesterinen

61

Before the lecture begins: unpacking how affective measures impact performance in general chemistry 1

Vanessa P. Bustamante and Regina F. Frey*

80

Striving to learn to do chemistry in the laboratory: epistemic conation as a fundamental driver of inquiry

Hendra Y. Agustian,* Bente Gammelgaard, Muhammad Aswin Rangkuti and Marie Larsen Ryberg

101

Exploring the effect of a technology-supported science writing heuristic approach on pre-service science teachers' written argumentation, representation, and reasoning

Azize Nur İnan, Fatma Yaman* and Brian Hand

119

Using social network analysis method to explore the cognitive knowledge structures of different high school student groups on the topic of "ethanol"

Shang Dou, Qing Zhou, Weiping Hu,* Xipei Guo and Yujing Guo

PAPERS

137

Characterizing epistemic atomic modeling knowledge

Salawat Lateef, Emmanuel Echeverri-Jimenez and Morgan Balabanoff*

151

Should we scaffold it? Analysing the effect of task format and scaffolding on students' learning gain

David Kranz, Paul P. Martin, Michael Schween and Nicole Graulich*

172

Using the EPIC (exposure, persuasion, identification, and commitment) to develop a measure of student buy-in to laboratory learning goals

Elizabeth B. Vaughan, A. Montoya-Cowan and Jack Barbera*

185

Problem-based learning with scaffolding assisted by mobile technology: enhancing students' understanding of chemical kinetics

Tadesse Hagos* and Abayneh Lemma

213

Mapping preservice chemistry teachers' group cognitive structures of electrochemistry and comparison with their understandings of electrochemistry concepts

Canan Nakiboğlu* and Nuri Nakiboğlu

PAPERS

241

Exploring the impact of career-relevant reading materials on students' utility perceptions of chemistry

Pallavi Nayyar, Jessica D. Young and Scott E. Lewis*

255

Socratic method of questioning: the effect on improving students' understanding and application of chemical kinetics concepts

Tadesse Hagos

280

Identification and reduction of critical errors in basic laboratory practical: utilizing video tutorials as a tool for enhancing efficiency

Radana Koudelílková, Eliška Moldšíkova L and Pavel Štarha*

291

Fostering STEM identity through storytelling: links to belonging, self-efficacy, classroom climate, and lab performance

Karen Ho,* Alfie Chen and Douglas B. Clark

304

Characterising the nature and effect of sensory overload in an undergraduate chemistry teaching laboratory

Sally Stone and Benjamin E. Arenas*

317

Principles to foster critical thinking skills and dispositions in an undergraduate physical-chemistry laboratory course: the impact of modified laboratory manuals

Lilian Danial, Jenna Koenen and Rüdiger Tiemann*

332

Different instructors—different symmetry: variation in instructional approaches and content emphasis in inorganic chemistry

Lu Shi, Shanna Hilborn, Samuel Pazicni and Maia Popova*

351

Towards defining, assessing and modelling competency levels in stoichiometry

Alexander Krause,* Sebastian Polarz, Anett Hoppe, Ralph Ewerth and Andreas Nehring

368

An exploratory study: impact of peer-led team learning on epistemology, self-efficacy, and belonging in chemistry

Vidushi Adlakha, Vaishali Vijay Shinde and Pratibha Varma-Nelson*

379

Bridging the expertise gap: a comparative case study of pedagogical scientific language knowledge between an experienced and a novice teacher

Xuan Liao and Rui Liu*

398

Note-taking moderates the relationship between invested mental effort and solving chirality tasks

Katrin Schuessler,* Michael Giese and Maik Walpuski

410

What does empathy look like to you? investigating undergraduate chemistry students' perceptions of empathy in regard to their lived experience at university

Luke Brutto, Alan Z. Chen, Reyne Pullen,* Sara H. Kyne* and Stephen R. George-Williams*

423

Enhancing students' agency and coherence in organic chemistry through transformed problem design

Julia Eckhard, Rebecca A. Scheck and Ira Caspari-Gnann*

461

Epistemic messages about how and why to learn in organic chemistry lectures

Elias Heinrich, Ryan L. Stowe and Nicole Graulich*

479

The faces of failure: understanding students' affective experiences with failure in introductory chemistry laboratory learning activities

Shauna Schechtel and Amanda Bongers*

PAPERS

494

"It makes me feel better... just because they said I had a solid argument:" characterization of student interaction with peer feedback

Mary Tess Urbanek, Danny Vinton and Alena Moon*

507

Investigating the Gordian knot: how teaching assistants enact equitable and effective teaching during acid–base titrations

Cassandra Miller and Meng–Yang Matthew Wu*

527

Evaluation of long-term effects of a force-based approach on student understanding of chemical bonding

Catalin Koro Arvidsson

545

Leveraging a hybrid learning environment and small group recitations to promote higher order learning: incorporating reform-minded instruction within a traditional general chemistry curriculum

Colomba Sanchez-Marsetti, Jiho Ahn, Eric Dao, Angie Lopez and Jack F. Eichler*

559

Formulation of the theory of equity in chemistry instruction

Anna Margiotta and Corina E. Brown*

PAPERS

576

Science practices in the general chemistry laboratory: hits, misses, and near misses

Norda Simone Stephenson,* Caroline Lund Dahlberg, Trà Huynh, Erin Duffy, Katherine Hunter, Luka Spring, Elayna Worline, Jessica Weaver and Kaitlyn Bolland

591

Mindset and achievement in general chemistry: insights from Turkish undergraduate students

Betül Demirdöğen,* Jacob D. McAlpin, Esen Uzuntiryaki-Kondakci and Jennifer E. Lewis

607

Chemistry in early childhood: storytelling and hands-on water-based activities to foster scientific concepts and ideas

Carla Morais,* Ana Ferreira, José Luís Araújo and Luciano Moreira

622

Layers of competence: analyzing 8th graders' perceptions of visual and verbal assessment questions on chemical processes *vis-à-vis* their performance

Einat Ben-Eliyahu and Elon Langbeheim*

638

Post-pandemic challenges in higher education: learning preferences, performance and dropout in a first-semester chemistry course

Nicolás Pérez, Lorena Martínez, Natalia Alvarez, Lucía Otero, Nicolás Veiga* and Julia Torres*

662

Why learning redox is difficult even with animations – students' adherence to cognitive resources

Ade Noorliza Niyamae and Maurice Man Wai Cheng*
