# The Historical Collection

## Unlock chemistry's past...

The Historical Collection is a new digital archive designed to make the significant scientific records we hold widely available.

The Collection includes:

- **Society Publications (1949–2012)**
- **Society Minutes (1841–1966)**
- **Historical Books and Papers (1505–1991)**

Featuring over 380,000 pages, this invaluable addition to any science library is a unique resource from the world's leading chemistry community.

**Contact your Account Manager or email [sales@rsc.org](mailto:sales@rsc.org) to add 500 years of scientific history to your archive.**

**...and help to shape its future**
